The Tagawa Coal Mine is located in Fukuoka Ken in the Island of Kinshui, Japan, and was discovered about twenty years ago. It was owned by the government and mined simply for the government's use.

Great improvements, however, were made since it was sold to a corporation about six years ago, by importing mining machinery from Europe and America.

Tagawa Coal is used more MARINE than all other Japanese coals in the following countries: China, Manila and Strait's Settlements. It has found its way even to Bombay.

Two cargoes have been imported into the Hawaiian Islands recently, and it has no superior in this market as stove or steam coal.

Her breathing soft and low.

As in her breast the waves of life.
